WALK-AROUND

Komatsu-integrated design for the best value, reliability, and versatility. Hydraulics, power train, frame, and all other major components are engineered by Komatsu. You get a machine whose components are designed to work together for higher production, greater reliability, and more versatility.

SAA6D125E-5 turbocharged after-cooled diesel engine provide an output of **197 kW** 264 HP with excellent productivity. This engine is EPA Tier 3 and EU stage 3A emissions certified. See page 6.

Hydrostatic driven engine cooling fan controlled automatically, reduces fuel consumption and operating noise levels. See page 6.

Preventative maintenance

- Centralized service station
- Enclosed hydraulic piping
- Modular power train design

See page 8.

Simple hull frame

and monocoque track frame with pivot shaft for greater reliability. See page 8.

Large blade capacities:

D85EX:

5.2 m³ 6.8 yd³ (Straight tilt dozer)

7.0 m³ 9.2 yd³ (Semi-U tilt dozer)

D85PX:

5.9 m³ 7.7 yd³ (Straight tilt dozer)

See page 6.

The track link life is greatly improved through increased bushing diameter and link height in addition to lubricated track. See page 8.

PALM COMMAND CONTROL SYSTEM (PCCS)

Komatsu's new ergonomically designed control system "PCCS" creates an operating environment with *"complete operator control."*

Human-machine interface

Palm command electronic controlled travel control joystick

Palm command travel joystick provides the operator with a relaxed posture and superb fine control without operator fatigue. Transmission gear shifting is simplified with thumb push buttons.

Full-adjustable suspension seat and travel control console

The travel control console has adjustment fore and aft, and height.

For improved rear visibility during reverse operations, the operator can adjust seat 15° to the right. (opt)

Facing front

When turned 15° (opt)

Palm command PPC controlled blade control joystick

Blade control joystick uses the PPC (Proportional Pressure Control) valve and joystick is similar to the travel control joystick. PPC control combined with the highly reliable Komatsu hydraulic system enables superb fine control.

Blade and ripper control joystick

Fuel control dial

Engine revolution is controlled by electric signal, providing ease of operation, eliminating maintenance of linkage and joints.

Height adjustable armrest

Armrest is height adjustable without any tools, providing the operator with firm arm support in an ideal armrest.

Outline of electronic control system

Power train electronic control system

Smooth and soft operation

D85EX/PX utilizes a newly designed power train electronic control system. The controller registers the amount of operator control (movements of lever and operation of switches) along with machine condition signals from each sensor, to calculate accurately the control of the transmission for optimal machine operation. The ease of operation and productivity of the new D85EX/PX is greatly improved through these new features.

Electronic Controlled Modulation Valve (ECMV) controlled transmission

Controller automatically adjusts each clutch engagement depending on travel conditions such as gear speed, revolution and shifting pattern. This provides smooth shockless clutch engagement, improved component reliability, improved component life and operator ride comfort.

Hydrostatic Steering System—smooth, powerful turning

The Hydrostatic Steering System (HSS) is powered by an independent hydraulic pump with engine power transmitted to both tracks without power interruption on the inside track. When the machine turns, the outside track moves faster and the inside slower, for smooth, powerful turns. Counter-rotation is available for minimum turning radius providing excellent maneuverability. Shock-free steering reduces machine vibration and minimizes operator fatigue.

- Turning while dozing—the machine turns by driving the left and right tracks under power at different speeds allowing the machine to travel at the same speed as in straight dozing.
- Side cutting—when side-loading the blade, straight travel can be maintained utilizing HSS.
- On downhill slopes—the machine doesn't require counter-steering. The joystick provides the same steering response on downhill slopes as on flat ground.
- Grading—can be done efficiently without damaging the ground, because the inside track is not locked during turning.

Preset travel speed function

Preset travel speed selection function is provided as standard equipment. The preset switch enables the operator to select a combination of forward/reverse gear shifts, from 4 patterns; F1-R1, F1-R2, F2-R1 and F2-R2, by using UP/DOWN shift switch, and once the shift pattern is selected, operator can control the machine, concentrating his attention on directional control only. Once F2-R2 pattern is selected, for example, 2nd gear is automatically selected when travel control joystick is moved into forward/reverse. This function reduces gear shifting frequency during machine operation, and is especially helpful, when used in combination with auto-downshift function.

Auto downshift function

Controller monitors engine speed, travel gear and travel speed. When load is applied and machine travel speed is reduced, the controller automatically downshifts to optimize gear speed to provide high fuel efficiency. This function provides comfortable operation and high productivity without manual downshifting. (This function can be deactivated with cancel switch.)

Actuated on heavy load or steep slope

PRODUCTIVITY FEATURES

Engine

The Komatsu SAA6D125E-5 engine delivers **197 kW** 264 HP at 1900 rpm. The fuel-efficient Komatsu engine, together with the heavy machine weight, make the D85EX/PX superior crawler dozers in both ripping and dozing operations. The engine is EPA Tier 3 and EU stage 3A emissions certified, and features direct fuel injection, turbocharger, air-to-air aftercooler, and cooled EGR system to maximize fuel efficiency.

To minimize noise and vibration, the engine is mounted to the main frame with rubber cushions.

Hydrostatic driven engine cooling fan

Fan rotation is automatically controlled depending on coolant and hydraulic oil temperature, saving fuel consumption and providing great productivity with a quiet operating environment.

Photo may include optional equipment

Work equipment

Large blade

Capacities of **5.2 m³** 6.8 yd³ (Straight tilt dozer for D85EX), **5.9 m³** 7.7 yd³ (D85PX), **7.0m³** 9.2 yd³ (Semi-U tilt dozer for D85EX) yield outstanding production. High-tensile-strength steel has been incorporated into the front and sides of the blade for increased durability.

Rippers (EX)

- The multi-shank ripper features a long sprocket center-to-ripper point distance, making ripping operation easy and effective while maintaining high penetration force.
- The multi-shank ripper is a parallelogram single shank ripper ideal for ripping in tough material. The ripping depth is adjustable in two stages.

Undercarriage

Low drive and long track undercarriage

Komatsu's design is extraordinarily tough and offers excellent grading ability and stability. Large-diameter bushings, increased track link heights, and improved oil-seals help to increase undercarriage durability.

Improvements

Numerous improvements to increase undercarriage reliability and durability have been incorporated. Serviceability has also been improved with the addition of remote greasing of the equalizer bar center pin.

WORKING ENVIRONMENT

Operator comfort

Operator comfort is essential for safe and productive work. The D85EX/PX provides a quiet, comfortable environment where the operator can concentrate on the work at hand.

Hexagonal pressurized cab

- The cab's new hexagonal design and large tinted glass windows provide excellent front, side, and rear visibility.
- Air filters and a higher internal air pressure combine to prevent dust from entering the cab.

Photo may include optional equipment

Comfortable ride with new cab damper mounting

D85EX/PX's cab mount uses a new cab damper which provides excellent shock and vibration absorption capacity with its long stroke. Cab damper mounts soften shocks and vibration while traveling over adverse conditions, which conventional mounting systems are unable to absorb. The cab damper spring isolates the cab from machine chassis, suppressing vibration and providing a quiet, comfortable operating environment.

Cab damper mounting

New suspension seat

D85EX/PX uses a new suspension seat. Fore and aft sliding rails and suspension spring increase strength and rigidity. The new seat provides excellent support, improving riding comfort. Fore and aft seat travel can cover almost all for all operator sizes.

MAINTENANCE

Preventative maintenance

Preventative maintenance is the only way to ensure long service life from your equipment. That's why Komatsu designed the D85EX/PX with conveniently located maintenance points to make necessary inspections and maintenance quick and easy.

Centralized service station

To assure convenient maintenance, the transmission and HSS oil filters, power train oil level gauges and hydraulic tank are arranged in the right side of the machine.

Monitor with self-diagnostic function

With the starting switch turned ON, the monitor displays on the display, check-before-starting and caution items appear on the lower right part of the panel. If the monitor finds abnormalities, corresponding warning lamp blinks and warning buzzer sounds. The monitor displays engine rpm and forward/reverse gear speed on the upper part of the monitor during operation. When abnormalities occur during operation, action code and service meter are displayed alternately. When a critical action code is displayed, the caution lamp blinks and a warning buzzer sounds to prevent the development of serious problems.

Enclosed hydraulic piping

Hydraulic piping for the blade tilt cylinder is completely housed in the push arm, ensuring damage protection from materials.

Easy/cleaning with hydraulic driven radiator fan

The radiator core and the core on the front side of the oil cooler can be easily cleaned by running the hydraulic engine fan in reverse. Accordingly, the cleaning intervals of those cores can be increased.

Modular power train design

Power train components are sealed in a modular design that allows the components to be dismantled and mounted without oil spillage.

Reliable simple structure

Simple hull structure main frame design increases durability and reduces stress concentration at critical areas. The track frame has a large cross section and utilizes pivot shaft mounting for greater reliability.

Maintenance free disc brakes

Wet disc brakes require less maintenance.

Gull-wing engine side covers (optional)

The opening area is further enlarged when gull-wing engine side covers are opened, facilitating engine maintenance and filter replacement. Side covers have been changed to a thick one-piece structure with a bolt-on catch to improve durability.

Heavy-duty track link

The track link life is greatly improved through increased bushing diameter and link height in addition to lubricated track.

CLEAN AND SILENT DESIGN

Clean engine

The SAA6D125E-5 engine is EPA (Environmental Protection Agency) Tier 3 and EU stage 3 emissions certified. So, it develops low emission of NOx, hydrocarbon, and black smoke remarkably, without sacrificing power or machine productivity.

Quiet design

The low-noise engine hydraulically driven fan, and rubber-mounted power train provide a quiet operation.

Use of recyclable parts

Recyclable parts are used, considering the effects on the environment.

Extended service interval

Long-life consumable parts such as filters and elements are used to lengthen their replacement interval to lower the maintenance cost.

TORQFLOW TRANSMISSION

Komatsu TORQFLOW transmission consists of a water-cooled, 3-element, 1-stage, 1-phase, torque converter and a planetary gear, multiple-disc clutch transmission which is hydraulically-actuated and force-lubricated for optimum heat dissipation. Gearshift lock lever and neutral safety switch prevent accidental starts.

Travel speed	Forward		Reverse	
	D85EX-15E0	D85PX-15E0	D85EX-15E0	D85PX-15E0
1st	3.3 km/h 2.1 mph	3.3 km/h 2.1 mph	4.4 km/h 2.7 mph	4.4 km/h 2.7 mph
2nd	6.1 km/h 3.8 mph	6.0 km/h 3.7 mph	8.0 km/h 5.0 mph	7.9 km/h 4.9 mph
3rd	10.1 km/h 6.3 mph	10.0 km/h 6.2 mph	13.0 km/h 8.1 mph	12.7 km/h 7.9 mph

FINAL DRIVES

Double-reduction final drive of spur and planetary gear sets to increase tractive effort and reduce gear tooth stresses for long final drive life. Segmented sprocket rims are bolt-on for easy replacement.

STEERING SYSTEM

PCCS lever controls for all directional movements. Pushing the PCCS lever forward results in forward machine travel, while pulling it rearward reverses the machine. Simply tilt the PCCS lever to left to make a left turn.

Hydrostatic Steering System (HSS) is powered by steering planetary units and an independent hydraulic pump and motor. Counter-rotation turns are also available. Wet, multiple-disc, pedal-controlled service brakes are spring-actuated and hydraulically released. Gear shift lock lever also applies parking brake.

Minimum turning radius D85EX-15E0 **1.99 m** 6'6"
 D85PX-15E0 **2.24 m** 7'4"

UNDERCARRIAGE

Suspension Oscillating equalizer bar and pivot shaft
 Track roller frame Monocoque, large section,
 durable construction

Rollers and idlers Lubricated track rollers

Track shoes

Lubricated tracks. Unique seals prevent entry of foreign abrasive material into pin to bushing clearances to provide extended service life. Track tension is easily adjusted with grease gun.

STANDARD EQUIPMENT

- Alternator 50 ampere/24V
- Back up alarm
- Batteries 140 Ah/2 x 12V
- Blower fan
- Decelerator pedal
- Dry-type air cleaner with dust evacuator and dust indicator
- Engine hood
- Final drive case wear guard
- Front pull hook
- Hinged front mask, perforated
- Hydraulic track adjusters
- Hydrostatic Steering System (HSS)
- Lighting system (including two front and rear lights)
- Muffler with rain cap
- Palm lever steering control
- Radiator reserve tank
- Rear cover
- Segmented sprockets
- Shoes:
 - 560 mm** 22" single-grouser (EX)
 - 910mm** 36" single-grouser (PX)
- Starting motors 7.5 kW/24 V
- Suspension seat and reclining
- TORQFLOW transmissions
- Track frames
- Track roller guards, full length (EX), center and end section (PX)
- Warning horn
- Water separator

OPTIONAL EQUIPMENT

- Air conditioner
- Alternator 75 ampere/24 V
- AM-FM radio with cassette
- Batteries 200 Ah/2 x 12V
- Engine side covers
- Fire extinguisher
- First-aid kit
- Heater and defroster
- Light for ripper point
- Lunchon box
- Mirror, rearview
- Panel cover
- Seat belt
- Shoes:
 - 610 mm** 24" Single grouser shoe (EX)
 - 660 mm** 26" Single grouser shoes (EX)
 - 910 mm** 36" Swamp shoes (PX)
- Starting motor 11 kW/24V
- Sun visor
- Suspension seat, turn, fabric material
- Thermos
- Tool kit
- Vandalism protection kit

ROPS canopy (without cab):*

Weight. **437 kg** 970 lb
 Roof dimensions
 Length **1368 mm** 4'6"
 Width **1850 mm** 6'1"
 Height from
 compartment floor. **1768 mm** 5'10"

*Meets ISO 3471 and SAE J1040 APR88 ROPS standards, as well as ISO 3449 FOPS standard.

ROPS for cab:*

Weight. **371 kg** 820 lb
 Roof dimensions
 Length **650 mm** 2'2"
 Width **1774 mm** 5'10"
 Height from
 compartment floor. **1754 mm** 5'9"

*Meets ISO 3471 and SAE J1040 APR88 ROPS standards.

Steel cab:*

Weight. **410 kg** 910 lb
 Dimensions:
 Length **1758 mm** 5'9"
 Width **1323 mm** 4'4"
 Height from compartment
 floor to ceiling **1592 mm** 5'3"

*Meets ISO 3449 FOPS standard.

Multi-shank ripper (EX):

Hydraulically controlled parallelogram ripper with three shanks.

Weight (including hydraulic control unit) **2500 kg** 5,520 lb
 Beam length **2246 mm** 7'4"
 Maximum lift above ground . . **564 mm** 1'10"
 Maximum digging depth **653 mm** 2'2"
